Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-28, 30, 52-58, and 64 are pending. Claims 1, 23-26, 52, 55, and 58 have been amended in this communication filed 09/12/06 entered as Response to Non-Final Action.
2. The claims rejections for claims 1, 24-26, and 52-58 have been overcome by Applicants' amendment to claim 1, 24-26, and 52-58 and is hereby withdrawn.
3. The objection to the specification has been overcome by Applicants' amendment to the specification and is hereby withdrawn.
4. After a thorough review of claims 1-28, 30, 52-58 and 64 a distinct difference in claims 1-28 and 30 and claims 52-58 and 64 has been found besides one group of claims being method claims and the other group of claims being system claims.

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28 and 30, drawn to a method for merging a plan sponsor's business needs with a retirement plan design, classified in class 705, subclass 36.
 - II. Claims 52-58 and 64, drawn to a system for receiving information about the plan sponsor including one or more business objectives of the plan sponsor, classified in class 705, subclass 35.
6. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one

Art Unit: 3694

subcombination is separately usable. In the instant case, subcombination Invention II has separate utility such as receiving information about the plan sponsor including one or more business objectives of the plan sponsor and determining plan rules based upon the one or more business objectives of the plan sponsor. Invention I has separate utility such as merging a plan sponsor's business needs with a retirement plan design, collecting information from the plan sponsor relating to the plan sponsor's business objectives, performing an analysis of the information, and generating a retirement plan with plan rules. Invention I can be used for merging the plan sponsor's business needs with a retirement plan design and Invention II can be used for receiving information about the plan sponsor's business objectives. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3694

7. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II and the search for Invention II is not required for Invention I, it is for these reasons restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

10. Suggestion to overcome the restriction of the claims is as follows: Claim 52, "a web site ... having information for merging a plan sponsor's business needs, the information including a retirement plan design; collecting information for the plan sponsor through the web site, the information including one or more of the plan sponsor's business objectives; and software executing on the computer, generating retirement plan rules base upon one or more of the plan sponsor's business objectives.
